

## Neuropsychology Track Requirements

### DESCRIPTION

The Neuropsychology Track emphasizes coursework, clinical training, and research experiences in the area of neuropsychology.

### DOCUMENTATION

Progress through the track can be stated on the student's CV. Successful completion of the track will be reflected on the graduate's transcript.

### ACCEPTANCE CRITERIA

Admittance is contingent on the student's level of commitment to research, course work, and clinical goals consistent with completing this track and pursuing a career in neuropsychology.

### CLINICAL TRAINING

- Attend one year of monthly neuropsychology seminars
- A year-long neuropsychological assessment clerkship at a local training site
- An advanced practicum placement in a neuropsychology setting that provides some combination of general clinical training and assessment, or a formal non-practicum placement in a neuropsychology setting, and
- A year-long internship focused on neuropsychology

### CLASSROOM WORK

Students will take courses in areas such as:

- Neuropsychology
- Psychopharmacology
- Physiological Psychology

### MEMBERSHIPS

Students are expected to become members of at least one of the following associations:

- The international Neuropsychology Society
- APA Division 40
- American Academy of Clinical Neuropsychology, and/or
- National Academy of Neuropsychology

### DISSERTATION AND PRESENTATIONS

- The content of the dissertation focuses on neuropsychology.
- Students present a neuropsychology-related research project at a professional neuropsychology conference (such as AACN, INS, NAN, or APA Division 40).
